

## Lab 9 – Create a Website with Node.js

**Using the provided files, create a local web server with node.js to serve up this website.**

### REQUIREMENTS:

1. Download and install node.js.
2. Create an app.js file to serve as your main application file.
3. Create a web server to handle file requests for the included html files.
4. Your app should handle 'File Not Found' errors.
5. Your app should run on locally on a browser through localhost.

### EXTRA CHALLENGE:
