

HTTP 5103 Assignment 2: Group Login

Format: Send zipped folder containing all files to sean.doyle@humber.ca.

BE SURE TO PUT YOUR NAME & SECTION IN THE FILENAME:

e.g. Assign2-B-YourName.zip

Purpose: To review control structures, prompt() and confirm() functions, *if* statement, *switch* statement and conditionals.

Using the provided html page:

Create a JavaScript file to allow the members of your Project Management team to “log in”.

REQUIREMENTS:

1. Attach the JavaScript file to the html file.
2. A popup box should ask the user which team they belong to.
3. Users that provide the correct team number will be asked what their first name is.
4. The code should check if the provided name belongs to a set list of the members of your Project Management team.
5. Valid members will be greeted by a popup message that welcomes them by their full name.
6. If a user does not provide the correct team number or first name, a popup message will let them know that they are denied access.
7. The program should handle empty strings, or the cancel button, with a popup that tells them that they need to enter a name.
